To contribute as a Business Analyst in a SaaS or fintech organization by translating business needs into scalable solutions, driving process automation, and enabling data-driven decisions that improve operational efficiency and product adoption.

🧠 PROFILE SUMMARY

- **Results-driven Business Analyst** with nearly 4 years of experience in supporting SaaS and fintech platforms through requirement discovery, process optimization, and data-led decision support.
- Proven ability to **bridge business objectives and technology execution** by translating complex operational needs into clear functional specifications and actionable delivery plans.
- Drove operational efficiency through **workflow automation, CRM optimization, and system integrations** that improve scalability, accuracy, and user experience.
- Strong collaborator across **product, engineering, QA, and operations teams**, enabling smooth Agile delivery and timely release of customer-facing enhancements.
- Adept at **leveraging data analysis, dashboards, and performance metrics** to uncover insights, track outcomes, and inform stakeholder decisions.
- **Managed AWS administration activities**, including provisioning, monitoring, access control, and performance optimization of cloud resources to ensure secure, scalable, and high-availability environments.
- Success in **supporting platform transitions, onboarding partners & improving adoption** through structured communication, training, and change enablement.
- Detail-oriented professional with solid exposure to **financial data operations, compliance-sensitive workflows, and quality assurance practices**.
- **Growth-minded analyst** known for ownership, analytical rigor, and the ability to thrive in fast-paced, high-impact startup and enterprise SaaS environments.

👤 CORE COMPETENCIES

- Business Requirements Elicitation & Functional Documentation
- Stakeholder Management & Cross-Functional Collaboration
- Agile & Scrum Delivery (Jira, Sprint Coordination, Backlog Support)
- Process Mapping, Workflow Optimization & Automation
- **AWS Administration**
- CRM Systems Management & Configuration (Zoho, Custom Platforms)
- Data Analysis & Insight Generation (SQL, **Python**, Excel, Google Sheets)
- Dashboarding, MIS Reporting & Decision Support
- UAT Planning, Execution & Defect Resolution
- Financial & Investment Data Operations (CAMS, KFin, AMFI)
- API & Integration Coordination (Data Pipelines, System Interfaces)
- Risk, Compliance Awareness & Data Accuracy Controls
- User Enablement, Training & Product Adoption Support

📊 SOFT SKILLS

📅 CAREER TIMELINE

- Since 2024** • Business Analyst – Operations & Automation
Rabbit Invest (Fintech Startup)
- 2022-2023** • Business Analyst / Project Engineer
Wipro – Client: Business App (SaaS for SMBs)
- 2022-2022** • Data Analyst – Intern
Myntra Engineering Manager

WORK EXPERIENCE

Business Analyst – Operations & Automation Rabbit Invest (Fintech Startup) | Jan 2024 – Present

- Executed end-to-end requirements discovery and solution alignment to support a strategic shift from direct-to-consumer to a B2B2C operating model, resulting in a **30% uplift in distributor participation**.
- Engineered automated CRM and communication workflows across WhatsApp and email channels, streamlining onboarding, investment nudges, and **lifecycle engagement for 1,000+ monthly customer interactions**.
- Defined, mapped, and validated operational process flows and API specifications for large-scale investment data ingestion, maintaining **data integrity across 20,000+ mutual fund records**.
- Collaborated with internal stakeholders and external partners to deliver CAMS and KFin integrations, eliminating manual reconciliation and **reducing reporting effort by over 80%** through Python-based automation.
- Executed UAT, defect triage, and production readiness for distributor dashboards and CRM capabilities, **lowering functional discrepancies by 30%**.
- Developed operational dashboards and analytical reports covering fund performance, commission structures, and transaction metrics to enable data-driven distributor decisions.
- Served as the primary coordination point between product, technology, and partner teams, successfully **onboarding 50+ distributor accounts** and improving platform adoption and retention.
- Analyzed digital campaign effectiveness using Meta Business Suite insights, optimizing targeting and spend efficiency to **deliver a 15% improvement in marketing ROI**.

Business Analyst / Project Engineer Wipro – Client: Business App (SaaS for SMBs) | Jul 2022 – Dec 2023

- Translated customer business needs into functional specifications and prioritized enhancements for CRM-driven SaaS capabilities supporting small and medium enterprises.
- Partnered with engineering and quality teams within an Agile delivery model to drive sprint execution, release readiness, and defect resolution across multiple feature cycles.
- Configured and optimized Zoho CRM modules, workflows, and performance dashboards, improving pipeline transparency and **increasing sales visibility by 40%**.
- Acted as the primary interface between client stakeholders and delivery teams, ensuring product evolution remained aligned with commercial objectives and user expectations.
- Led product walkthroughs, user enablement sessions, and **adoption workshops for 100+ SMB customers**, accelerating onboarding success and contributing to measurable churn reduction.

Data Analyst – Intern Myntra | Jan 2022 – Jun 2022

- Examined customer funnel performance across regions, product categories, and price bands to identify conversion leakage and demand elasticity trends.
- Developed analytical views and management dashboards using SQL and Google Sheets to support data-backed decisions on pricing and promotional strategies.
- Synthesized analytical insights into executive-ready presentations, enabling leadership teams to refine campaign planning and commercial interventions.
- Assisted with on-demand analytics and reporting automation initiatives, strengthening exposure to visualization standards, data validation, and reporting governance.

EDUCATION & CERTIFICATIONS

- B.Tech. – Mechanical (Automotive Specialization) | VIT University | Jul 2022
 - Member, Service to Society Club: organized blood donation & social welfare events.
 - Team member, Baja SAE Competition – worked on vehicle brakes subsystem; contributed to an award-winning off-road vehicle.

Certifications:

- Agile Fundamentals
- SQL for Data Analysis
- Google Data Analytics
- Business Analysis Foundations
